

Application Serial No. 10/602,957
Reply to Office Action of September 22, 2004

PATENT
Docket: CU-3270

REMARKS/ARGUMENTS

Reconsideration is respectfully requested.

Claims 1-11 are pending in the present application before this amendment.

By the present amendment, Claim 2 has been cancelled without prejudice, and Claim 6 has been amended. No new matter has been added.

Claim 6 has been amended as suggested by the Examiner, and withdrawal of the objection is respectfully requested.

Claims 2-4 and 6 are indicated as being allowable if they are rewritten in independent form including all limitations of the base claim and any intervening claims.

In response, Claim 1 has been amended to basically incorporate the limitations of Claim 2 reciting the hole being rectangular as well as being a square.

Applicants agree with the Office Action page 6 that Kim '636 and Song do not teach a rectangular hole as claimed in Claim 2, but asserts further none of the cited references teach the hole being a square, either. In this regard, Claim 1 has been amended to recite --a rectangular or square hole -- in order not to unnecessarily narrow the scope of the hole.

For the reasons set forth above, Applicants respectfully submit that Claims 1 and 3-11 pending in this application are in condition for allowance over the cited references. This amendment is considered to be responsive to all points raised in the Office Action. Accordingly, Applicants respectfully request reconsideration and withdrawal of the outstanding rejections and earnestly solicit an indication of allowable subject matter.
